

Project Development Phase

Functional & Performance Testing Template

Date	20 July 2026
Team ID	FinWise AI Team (SmartBridge SIP 2026 - SRM AP)
Project Name	FinWise AI - Intelligent Loan Eligibility, Credit Analysis & Financial Advisory Platform
Maximum Marks	4 Marks

Test Scenarios & Results

Test Case ID	Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
FT-01	Salary / age / credit score input validation	Enter valid and invalid values (negative, blank, non-numeric) into eligibility form fields	Valid inputs accepted; clear error shown for invalid inputs	Validation messages shown correctly for all invalid cases	Pass
FT-02	Loan eligibility rule evaluation	Enter salary > 30,000, credit score > 700, EMI < 20,000, age >= 21	System marks user Eligible and shows amount = Salary x 20	Eligible status and correct amount displayed	Pass
FT-03	Credit score classification	Enter scores in Excellent, Good and Poor ranges	Correct classification label shown for each range	Classification matched expected range in all 3 cases	Pass
FT-04	EMI calculation accuracy	Enter loan amount, tenure and interest rate; compare with manual reducing-balance formula	Calculated EMI matches manual computation (+/- rounding)	EMI matched manual calculation	Pass
FT-05	AI Tips generation (Groq API)	Submit valid financial inputs on the Tips page with a valid Groq API key configured	Personalised financial tips are generated and displayed	Tips generated and rendered correctly	Pass
FT-06	API key / connection check	Submit a request with an invalid or missing Groq API key	A clear error/warning is shown instead of a silent failure	Error message displayed as expected	Pass
FT-07	Data logging to Google Sheets	Submit a form and check the linked Google Sheet	A new row appears with the submitted data	New row appended successfully	Pass
PT-01	Page load / calculation response time	Load each page and trigger the rule-based calculations, measure time	Rule-based results appear in under 1 second	Results appeared instantly (<1s)	Pass
PT-02	AI response time test	Trigger AI Tips generation and measure time using a stopwatch	Response should be returned in under 5 seconds under normal load	Average response ~2-4 seconds	Pass

Test Case ID	Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
PT-03	Responsive layout test	Open each page at mobile, tablet and desktop viewport widths	Layout adapts without overlapping or broken elements	Layout rendered correctly at all breakpoints	Pass
